Two worlds. The same premises.

A Horos reasoning notebook · Aristotle, *Prior Analytics* I.

This notebook records a modern membership experiment beside an ancient text. Truth in one world is separate from validity across all permitted worlds. The diagrams are modern; the English and teaching Latin are new.

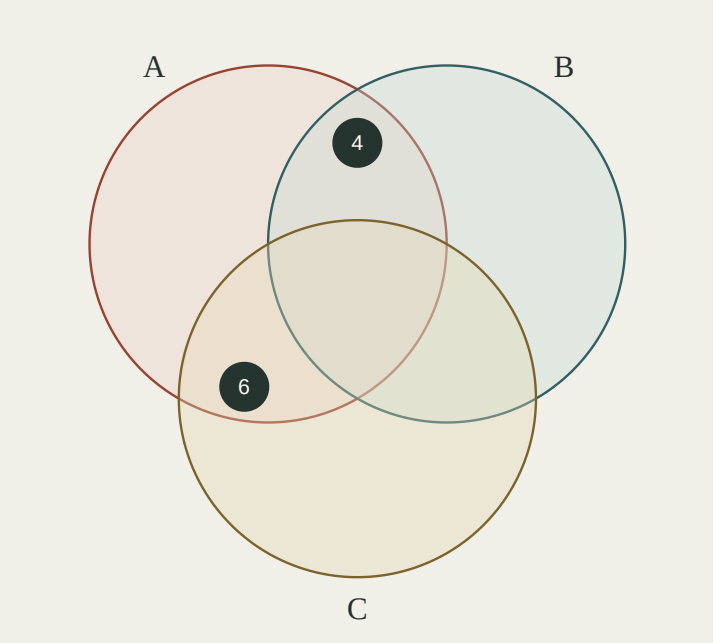

Your explanation

Object 5 is C but not A. Every B is A and no C is B still hold.
Aristotle's horse & stone substitutions preserve the premise forms while changing the conclusion. The two worlds therefore refute the proposed inference, even though its conclusion is true in the first world.

Cited passages: I.4 · 26a2–9; I.1 · 24b18–20.

The two snapshots use the same premises, proposed conclusion, and existence assumptions.

Pinned world: The horse & the stone

Required inhabitants: A, B, C. The universe must be nonempty.

Truth in this world

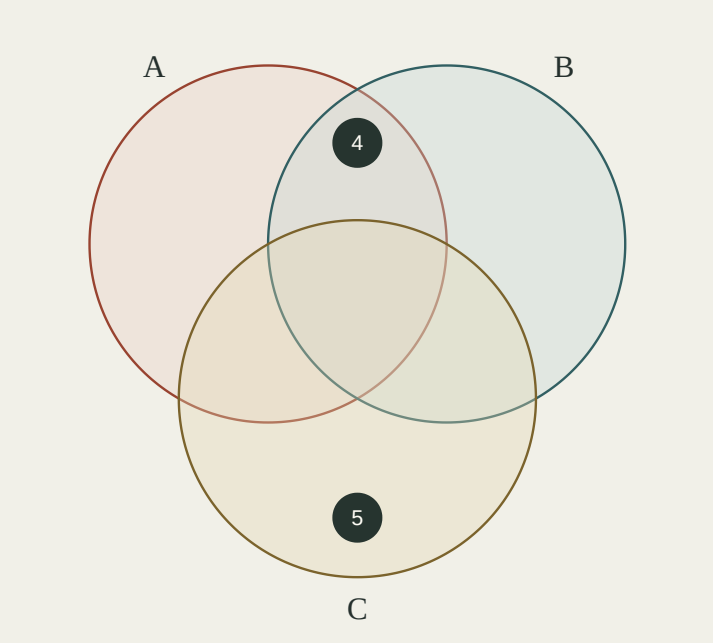

Statement	Truth	Reason
Premise: Every B is A	True	No object violates this universal.
Premise: No C is B	True	No object violates this universal.
Proposed conclusion: Every C is A	True	No object violates this universal.

World status: agreement.

- Object 4: In A and B; outside C.
- Object 6: In A and C; outside B.

Exhaustive check under these assumptions: 12 permitted patterns; 4 with a true conclusion; 8 counterexamples. Inference: invalid in this modern model.

Current world: The horse & the stone

Required inhabitants: A, B, C. The universe must be nonempty.

Truth in this world

Statement	Truth	Reason
Premise: Every B is A	True	No object violates this universal.
Premise: No C is B	True	No object violates this universal.
Proposed conclusion: Every C is A	False	Object 5 violates this universal.

World status: counterexample.

- Object 4: In A and B; outside C.
- Object 5: In C; outside A and B.

Exhaustive check under these assumptions: 12 permitted patterns; 4 with a true conclusion; 8 counterexamples. Inference: invalid in this modern model.

Why the search is complete

With three classes, an object has one of eight yes/no membership patterns. These propositions ask only which regions are occupied, never how many objects occupy them. Keep one object from each occupied region of any world: all four proposition kinds and each existence condition keep their truth values. Thus every possible counterexample has a representative among the 255 nonempty occupancy patterns. The completely empty pattern is an editable draft but not a permitted universe. This proof applies to the defined model, not to all of Aristotle's logic.

“Every” and “no” are true if their subject class is empty in this model. “Some” and “some not” require a witness; “some” can include all. Requiring an inhabitant is an additional assumption. The existence experiments do not settle Aristotle’s historical treatment of empty terms. The source’s taking of an instance must be read in its own setting.

Greek A / B / Γ becomes A / B / C. In I.6 Π / P / Σ becomes A / B / C, with N the instance.

What has to follow

I.1 · 24b18–20 · Printed page 24

συλλογισμὸς δέ ἐστι λόγος ἐν ᾧ τεθέντων τινῶν ἕτερόν τι τῶν κειμένων ἐξ ἀνάγκης συμβαίνει τῷ ταῦτα εἶναι.

Close English

A deduction is an account in which, when certain things have been laid down, something different from what was laid down follows of necessity because those things are so.

Teaching Latin · new translation

Syllogismus est ratio in qua, quibusdam positis, aliquid aliud ab iis quae posita sunt necessario sequitur, eo quod haec ita sunt.

The passage distinguishes a consequence that must follow from one that merely happens to be true. ‘Deduction’ translates syllogismos here; this workshop treats only a small, non-modal part of the Prior Analytics. The name Horos comes from ὅρος, ‘term’, defined just before this passage at 24b16–18.

Contextual language notes

Greek	Teaching Latin	Reading note
συλλογισμὸς	syllogismus	syllogismós: a deduction. The word is broader here than a classroom formula of two premises and one conclusion.
τεθέντων τινῶν	quibusdam positis	tetheéntōn tinōn: ‘certain things having been laid down’. A genitive absolute supplies the conditions of the deduction.
ἐξ ἀνάγκης	necessario	ex anánkēs: ‘of necessity’. A true conclusion in one example is weaker than this requirement.
τῷ ταῦτα εἶναι	eo quod haec ita sunt	tôi taûta eînai: ‘because these things are so’. The consequence must depend on what was laid down.

The horse and the stone

I.4 · 26a2–9 · Printed page 26

εἰ δὲ τὸ μὲν πρῶτον παντὶ τῷ μέσῳ ἀκολουθεῖ, τὸ δὲ μέσον μηδενὶ τῷ ἐσχάτῳ ὑπάρχει, οὐκ ἔσται συλλογισμὸς τῶν ἄκρων· οὐδὲν γὰρ ἀναγκαῖον συμβαίνει τῷ ταῦτα εἶναι· καὶ γὰρ παντὶ καὶ μηδενὶ ἐνδέχεται τὸ πρῶτον τῷ ἐσχάτῳ ὑπάρχειν, ὥστε οὔτε τὸ κατὰ μέρος οὔτε τὸ καθόλου γίνεται ἀναγκαῖον· μηδενὸς δὲ ὄντος ἀναγκαίου διὰ τούτων οὐκ ἔσται συλλογισμός. ὅροι τοῦ παντὶ ὑπάρχειν ζῷον—ἄνθρωπος—ἵππος, τοῦ μηδενὶ ζῷον—ἄνθρωπος—λίθος.

Close English

If the first follows every middle, but the middle belongs to none of the last, there will be no deduction connecting the extremes. Nothing necessary follows because these things are so: the first can belong both to every last and to none. Thus neither a particular nor a universal result becomes necessary. With nothing necessary through these premises, there will be no deduction. Terms for belonging to every: animal, human, horse; for belonging to none: animal, human, stone.

Teaching Latin · new abridgment

Si primum omni medio convenit, medium autem nulli extremo, syllogismus extremorum non erit. Nihil enim necessarium ex his sequitur. Termini ad omni convenire: animal, homo, equus; ad nulli convenire: animal, homo, lapis.

The Latin condenses the passage. In the two substitutions A = animal, B = human; C is first horse, then stone. The premise forms stay the same while the interpretation of C changes. Our buttons supply small illustrative membership worlds, not Aristotle's actual diagram or a complete inventory of animals. Starting with all three classes inhabited avoids an empty-class shortcut.

Contextual language notes

Greek	Teaching Latin	Reading note
παντὶ τῷ μέσῳ	omni medio	pantì tôi mésōi: ‘to every middle’. The dative names what the predicate applies to. A belongs to every B means every B is A, not every A is B.
μηδενὶ	nulli	mēdenì: ‘to none’. A universal negative excludes every shared object.
τῶν ἄκρων	extremorum	tôn ákrōn: ‘of the extremes’. Here A and C are the extremes; B is the middle term.

Greek	Teaching Latin	Reading note
ὅροι	termini	hóroi: terms. The sequence animal–human–horse names A, B, C; it is not itself a chain of valid implications.
λίθος	lapis	líthos: stone. Substituting this for horse changes the relation of C to A while preserving the two premise forms.

Reversal, with a smaller claim

I.2 · 25a7–9 · Printed page 25

τὴν δὲ κατηγορικὴν ἀντιστρέφειν μὲν ἀναγκαῖον, οὐ μὴν καθόλου ἀλλ᾽ ἐν μέρει, οἷον εἰ πᾶσα ἡδονὴ ἀγαθόν, καὶ ἀγαθόν τι εἶναι ἡδονήν.

Close English

The affirmative must convert, though not universally but in part: for example, if every pleasure is a good, some good is also a pleasure.

Teaching Latin · new translation

Affirmativam converti necesse est, non tamen universaliter sed particulariter: si omnis voluptas bonum est, aliquod bonum voluptas est.

This is a conditional example, not Aristotle endorsing the premise that every pleasure is good. The workshop uses A = good and B = pleasure only as a reading aid. In the modern membership model, the particular conclusion also needs B to have an inhabitant. The checkbox makes that assumption explicit; it does not claim to settle how empty terms function throughout Aristotle's logic. The letter proof is printed nearby at 25a17–19.

Contextual language notes

Greek	Teaching Latin	Reading note
ἀντιστρέφειν	converti	antistréphein: to convert, or reverse the terms. This is a relation between propositions, not turning a word into its opposite.
καθόλου	universaliter	kathólou: universally. Reversal does not preserve the universal affirmative in the proposed form.
ἐν μέρει	particulariter	en mérei: in part, particularly. ‘Some’ needs a witness; it does not mean ‘some but not all’.
ἡδονὴ	voluptas	hēdonḕ: pleasure. Here it belongs to a hypothetical example, not a conclusion about ethics.

Set out one instance

I.6 · 28a23–26 · Printed page 28

ἔστι δὲ καὶ διὰ τοῦ ἀδυνάτου καὶ τῷ ἐκθέσθαι ποιεῖν τὴν ἀπόδειξιν· εἰ γὰρ ἄμφω παντὶ τῷ Σ ὑπάρχει, ἂν ληφθῇ τι τῶν Σ οἷον τὸ Ν, τούτῳ καὶ τὸ Π καὶ τὸ Ρ ὑπάρξει, ὥστε τινὶ τῷ Ρ τὸ Π ὑπάρξει.

Close English

The proof can also be made through the impossible and by setting out an instance. For if both belong to every S, and one of the Ss is taken, say N, both P and R will belong to it; so P will belong to some R.

Teaching Latin · new translation

Probatio etiam per impossibile et per expositionem fieri potest. Si enim utrumque omni S convenit, et sumitur aliquod S, velut N, huic et P et R convenient; itaque P alicui R conveniet.

The printed terms are Π, P, Σ, with N naming the instance. The board renames Π to A, P to B, and Σ to C; object 8 can play the role of N. The Greek describes taking an instance. Allowing C to be empty is a modern contrast, not a claim that Aristotle accepts this counterexample against his own inference. This workshop does not adjudicate the scholarly debate about existential import.

Contextual language notes

Greek	Teaching Latin	Reading note
τῷ ἐκθέσθαι	per expositionem	tôi ekthésthai: ‘by setting out’. Often called ekthesis, the move takes an instance to expose the shared predication.
ἂν ληφθῇ	si sumitur	àn lēphthêi: ‘if it is taken’. The passive subjunctive occurs in a conditional clause. It is the step to inspect when there is no C to take.
τι τῶν Σ	aliquod S	ti tôn S: ‘one of the Ss’. A partitive genitive names the class from which the instance is taken.
τούτῳ	huic	toútōi: ‘to this’. Both predicates apply to the same instance, which supplies the particular conclusion.

The universal chain

I.4 · 25b37–40 · Printed page 25

εἰ γὰρ τὸ Α κατὰ παντὸς τοῦ Β καὶ τὸ Β κατὰ παντὸς τοῦ Γ, ἀνάγκη τὸ Α κατὰ παντὸς τοῦ Γ κατηγορεῖσθαι· πρότερον γὰρ εἴρηται πῶς τὸ κατὰ παντὸς λέγομεν.

Close English

For if A is predicated of every B, and B of every C, A must be predicated of every C; we have already said what we mean by ‘of every’.

Teaching Latin · new translation

Si A de omni B, et B de omni C praedicatur, necesse est A de omni C praedicari; iam enim dictum est quid significet de omni.

The source writes Greek Γ where the board uses C. Take any C. The second premise makes it B, and the first makes it A. If there are no Cs, the modern universal still has no violating instance. A particular conclusion (‘Some C is A’) needs an additional inhabitant. The circles and finite-pattern proof are modern explanations, not diagrams from Bekker's text.

Contextual language notes

Greek	Teaching Latin	Reading note
κατὰ παντὸς	de omni	katà pantòs: ‘of every’. The genitive after katá expresses the subject range of the predication.
κατηγορεῖσθαι	praedicari	katēgoreîsthai: ‘to be predicated’. The predicate A is said of the subject C; English reverses their surface order in ‘Every C is A’.
ἀνάγκη	necesse est	anánkē: necessity; here ‘it is necessary’. This is what a merely agreeing example cannot show.

Edition and text policy

Aristotle, Prior Analytics I. Greek text transcribed from Immanuel Bekker, Aristotelis opera, volume I (Berlin: G. Reimer, 1831), printed pages 24, 25, 26 and 28. Complete page images are retained from Internet Archive item Bekker1831. This is a nineteenth-century printed edition, not an ancient manuscript.

Line breaks and line-end hyphenation are joined; Greek accents and punctuation are normalized for reading. Excerpts have explicit boundaries. English and teaching Latin are new translations for this workshop; Latin is not presented as an ancient or medieval textual witness. The two-worlds Latin is an abridgment. The Greek text and printed scans are public domain.

Φανερὸν ἓν ἐκ τῶν εἰρημένων ὅτι ἐάν τε ὅτως ἔχωσιν οἱ ὅροι πρὸς ἀλλήλους ὡς ἐλέχθη, γίνεται συλλογισμὸς ἐξ ἀνάγκης, ἄν τ' ᾖ συλλογισμός, ἀνάγκη τοὺς ὅρους ὅτως ἔχειν. δῆλον δὲ καὶ ὅτι πάντες ἀτελεῖς εἰσὶν οἱ ἐν τούτῳ τῷ σχήματι συλλογισμοί (πάντες γὰρ ἐπιτελοῦνται προσλαμβανομένων τινῶν, ἃ ἢ ἐνυπάρχει τοῖς ὅροις ἐξ ἀνάγκης ἢ τίθενται ὡς ὑποθέσεις, οἷον ὅταν διὰ τῆς ἀδυνάτου δεικνύωμεν), καὶ ὅτι ὁ γίνεται καταφατικὸς συλλογισμὸς διὰ τούτου τοῦ σχήματος, ἀλλὰ πάντες ζερητικοί, καὶ οἱ καθόλου καὶ οἱ κατὰ μέρος.

6 Ἐὰν δὲ τῷ αὐτῷ τὸ μὲν παντὶ τὸ δὲ μηδενὶ ὑπάρχῃ, ἢ ἄμφω παντὶ ἢ μηδενί, τὸ μὲν σχῆμα τὸ τοιοῦτον καλῶ τρίτον, μέσον δ' ἐν αὐτῷ λέγω καθ' οὗ ἄμφω τὰ κατηγορούμενα, ἄκρα δὲ τὰ κατηγορούμενα, μεῖζον δ' ἄκρον τὸ πορρώτερον τοῦ μέσου, ἔλαττον δὲ τὸ ἐγγύτερον. τίθεται δὲ τὸ μέσον ἔξω μὲν τῶν ἄκρων, ἔσχατον δὲ τῇ θέσει. τέλειος μὲν οὖν ὁ γίνεται συλλογισμὸς ὁδ' ἐν τούτῳ τῷ σχήματι, δυνατὸς δ' ἔσαι καὶ καθόλου καὶ μὴ καθόλου τῶν ὅρων ὄντων πρὸς τὸ μέσον. καθόλου μὲν οὖν ὄντων, ὅταν καὶ τὸ Π καὶ τὸ Ρ παντὶ τῷ Σ ὑπάρχῃ, ὅτι τινὶ τῷ Ρ τὸ Π ὑπάρξει ἐξ ἀνάγκης· ἐπεὶ γὰρ ἀντιστρέφει τὸ κατηγορικόν, ὑπάρξει τὸ Σ τινὶ τῷ Ρ, ὡς' ἐπεὶ τῷ μὲν Σ παντὶ τὸ Π, τῷ δὲ Ρ τινὶ τὸ Σ, ἀνάγκη τὸ Π τινὶ τῷ Ρ ὑπάρχειν· γίνεται γὰρ συλλογισμὸς διὰ τοῦ πρώτου σχήματος. ἔσι δὲ καὶ διὰ τοῦ ἀδυνάτου καὶ τῷ ἐκθέσθαι ποιεῖν τὴν ἀπόδειξιν· εἰ γὰρ ἄμφω παντὶ τῷ Σ ὑπάρχει, ἂν ληφθῇ τι τῶν Σ οἷον τὸ Ν, τούτῳ καὶ τὸ Π καὶ τὸ Ρ ὑπάρξει, ὥσε τινὶ τῷ Ρ τὸ Π ὑπάρξει. καὶ ἂν τὸ μὲν Ρ παντὶ τῷ Σ, τὸ δὲ Π μηδενὶ ὑπάρχῃ, ἔσαι συλλογισμὸς ὅτι τὸ Π τινὶ τῷ Ρ οὐχ ὑπάρξει ἐξ ἀνάγκης· ὁ γὰρ αὐτὸς τρόπος τῆς ἀποδείξεως ἀντιγραφείσης τῆς Ρ Σ προτάσεως. δειχθείη δ' ἂν καὶ διὰ τῆς ἀδυνάτου καθάπερ ἐπὶ τῶν πρότερον. ἐὰν δὲ τὸ μὲν Ρ μηδενὶ τὸ δὲ Π παντὶ ὑπάρχῃ τῷ Σ, οὐκ ἔσαι συλλογισμός. ὅροι τοῦ ὑπάρχειν ζῷον – ἵππος – ἄνθρωπος, τοῦ μὴ ὑπάρχειν ζῷον – ἄψυχον – ἄνθρωπος. ὁδ' ὅταν ἄμφω κατὰ μηδενὸς τοῦ Σ λέγηται, οὐκ ἔσαι συλλογισμός. ὅροι τοῦ ὑπάρχειν ζῷον – ἵππος – ἄψυχον, τοῦ μὴ ὑπάρχειν ἄνθρωπος – ἵππος – ἄψυχον· μέσον ἄψυχον. φανερὸν ἓν καὶ ἐν τούτῳ τῷ σχήματι πότ' ἔσαι καὶ πότ' οὐκ ἔσαι συλλογισμὸς καθόλου τῶν ὅρων ὄντων. ὅταν μὲν γὰρ ἀμφότεροι οἱ ὅροι ὦσι κατηγορικοί, ἔσαι συλλογισμὸς ὅτι τινὶ ὑπάρχει τὸ ἄκρον τῷ ἄκρῳ, ὅταν δὲ ζερητικοί, οὐκ ἔσαι. ὅταν δ' ὁ μὲν ᾖ ζερητικὸς ὁ δὲ καταφατικός, ἐὰν μὲν ὁ μεῖζων γένηται ζερητικὸς ἄτερος δὲ καταφατικός, ἔσαι συλλογισμός. ὅτι τινὶ οὐχ ὑπάρχει τὸ ἄκρον τῷ ἄκρῳ, ἐὰν δ' ἀνάπαλιν, οὐκ ἔσαι.

Ἐὰν δ' ὁ μὲν ᾖ καθόλου πρὸς τὸ μέσον ὁ δ' ἐν μέρει, κατηγορικῶν μὲν ὄντων ἀμφοῖν ἀνάγκη γίνεσθαι συλλογισμόν, ἂν ὁποτεροσῶν ᾖ καθόλου τῶν ὅρων. εἰ γὰρ τὸ μὲν Ρ παντὶ τῷ Σ τὸ δὲ Π τινί, ἀνάγκη τὸ Π τινὶ τῷ Ρ ὑπάρχειν. ἐπεὶ γὰρ ἀντιστρέφει τὸ καταφατικόν, ὑπάρξει τὸ Σ τινὶ τῷ Π, ὡς' ἐπεὶ τὸ μὲν Ρ παντὶ τῷ Σ, τὸ δὲ Σ τινὶ τῷ Π, καὶ τὸ Ρ τινὶ τῷ Π ὑπάρξει· ὥσε τὸ Π τινὶ τῷ Ρ. πάλιν εἰ τὸ μὲν Ρ τινὶ τῷ Σ τὸ δὲ Π παντὶ ὑπάρχει, ἀνάγκη τὸ Π τινὶ τῷ Ρ ὑπάρχειν· ὁ γὰρ αὐτὸς τρόπος τῆς ἀποδείξεως. ἔσι δ' ἀποδεῖξαι καὶ διὰ τοῦ ἀδυνάτου καὶ τῇ ἐκθέσει, καθάπερ ἐπὶ τῶν προτέρων. ἐὰν δ' ὁ μὲν ᾖ κατηγορικὸς ὁ δὲ ζερητικός, καθόλου δὲ ὁ κατηγορικός, ὅταν μὲν ὁ ἐλάττων ᾖ κατηγορικός, ἔσαι συλλογισμός. εἰ γὰρ τὸ Ρ παντὶ τῷ Σ, τὸ δὲ Π τινὶ μὴ ὑπάρχει, ἀνάγκη τὸ Π τινὶ τῷ Ρ μὴ ὑπάρχειν. εἰ γὰρ παντί, καὶ τὸ Ρ παντὶ τῷ Σ καὶ τὸ Π παντὶ τῷ Σ ὑπάρξει· ἀλλ' οὐχ ὑπῆρχεν. δείκνυται δὲ καὶ ἄνευ τῆς ἀπαγωγῆς, ἐὰν ληφθῇ τι τῶν Σ ᾧ τὸ Π μὴ ὑπάρχει. ὅταν δ' ὁ μεῖζων ᾖ κατηγορικός, οὐκ ἔσαι συλλογισμός, οἷον εἰ τὸ μὲν Π παντὶ τῷ Σ, τὸ δὲ Ρ τινὶ τῷ Σ μὴ ὑπάρχει. ὅροι τοῦ παντὶ ὑπάρχειν ἔμψυχον – ἄνθρωπος – ζῷον. τοῦ δὲ μηδενὶ οὐκ ἔσι λαβεῖν ὅρους, εἰ τινὶ μὲν ὑπάρχει τῷ Σ τὸ Ρ, τινὶ δὲ μή· εἰ γὰρ παντὶ τὸ Π τῷ Σ ὑπάρχει, τὸ δὲ Ρ τινὶ τῷ Σ, καὶ τὸ Π τινὶ τῷ Ρ ὑπάρξει· ὑπέκειτο δὲ μηδενὶ ὑπάρχειν. ἀλλ' ὥσπερ ἐν τοῖς πρότερον λεκτέον· ἀδιορίσῳ γὰρ ὄντος τοῦ τινὶ μὴ ὑπάρχειν καὶ τὸ μηδενὶ ὑπάρχον ἀληθὲς εἰπεῖν τινὶ μὴ ὑπάρχειν· μηδενὶ δὲ ὑπάρχοντος οὐκ ἦν συλλογισμός. φανερὸν ἓν ὅτι οὐκ ἔσαι συλλογισμός. ἐὰν δ' ὁ ζερητικὸς ᾖ καθόλου τῶν ὅρων, ὅταν μὲν ὁ μεῖζων ᾖ ζερητικὸς ὁ δὲ ἐλάττων κατηγορικός, ἔσαι συλλογισμός. εἰ γὰρ τὸ Π μηδενὶ τῷ Σ, τὸ δὲ Ρ τινὶ ὑπάρχει τῷ Σ, τὸ Π τινὶ τῷ Ρ οὐχ ὑπάρξει· πάλιν γὰρ ἔσαι τὸ πρῶτον σχῆμα τῆς Ρ Σ προτάσεως ἀντιγραφείσης. ὅταν δὲ ὁ ἐλάττων ᾖ ζερητικός, οὐκ ἔσαι συλλογισμός. ὅροι τοῦ ὑπάρχειν ζῷον – ἄνθρωπος – ἄγριον, τοῦ μὴ ὑπάρχειν ζῷον – ἐπιςήμη – ἄγριον· μέσον ἀμφοῖν τὸ ἄγριον. ὁδ' ὅταν ἀμφότεροι ζερητικοὶ τεθῶσιν, ᾖ δ' ὁ μὲν καθόλου ὁ δ' ἐν μέρει. ὅροι

SIL OPEN FONT LICENSE Version 1.1 - 26 February 2007
-----------------------------------------------------------

PREAMBLE
The goals of the Open Font License (OFL) are to stimulate worldwide
development of collaborative font projects, to support the font creation
efforts of academic and linguistic communities, and to provide a free and
open framework in which fonts may be shared and improved in partnership
with others.

The OFL allows the licensed fonts to be used, studied, modified and
redistributed freely as long as they are not sold by themselves. The
fonts, including any derivative works, can be bundled, embedded,
```

redistributed and/or sold with any software provided that any reserved names are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

DEFINITIONS
"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting -- in part or in whole -- any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical writer or other person who contributed to the Font Software.

PERMISSION & CONDITIONS
Permission is hereby granted, free of charge, to any person obtaining a copy of the Font Software, to use, study, copy, merge, embed, modify, redistribute, and sell modified and unmodified copies of the Font Software, subject to the following conditions:

1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.

2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy contains the above copyright notice and this license. These can be included either as stand-alone text files, human-readable headers or in the appropriate machine-readable metadata fields within text or binary files as long as those fields can be easily viewed by the user.

3) No Modified Version of the Font Software may use the Reserved Font Name(s) unless explicit written permission is granted by the corresponding Copyright Holder. This restriction only applies to the primary font name as presented to the users.

4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font Software shall not be used to promote, endorse or advertise any Modified Version, except to acknowledge the contribution(s) of the

Copyright Holder(s) and the Author(s) or with their explicit written permission.

5) The Font Software, modified or unmodified, in part or in whole, must be distributed entirely under this license, and must not be distributed under any other license. The requirement for fonts to remain under this license does not apply to any document created using the Font Software.

TERMINATION
This license becomes null and void if any of the above conditions are not met.

SIL OPEN FONT LICENSE Version 1.1 - 26 February 2007

PREAMBLE
The goals of the Open Font License (OFL) are to stimulate worldwide development of collaborative font projects, to support the font creation efforts of academic and linguistic communities, and to provide a free and open framework in which fonts may be shared and improved in partnership with others.

The OFL allows the licensed fonts to be used, studied, modified and redistributed freely as long as they are not sold by themselves. The fonts, including any derivative works, can be bundled, embedded, redistributed and/or sold with any software provided that any reserved names are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

DEFINITIONS
"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting -- in part or in whole -- any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical

writer or other person who contributed to the Font Software.

PERMISSION & CONDITIONS
Permission is hereby granted, free of charge, to any person obtaining a copy of the Font Software, to use, study, copy, merge, embed, modify, redistribute, and sell modified and unmodified copies of the Font Software, subject to the following conditions:

1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.

2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy contains the above copyright notice and this license. These can be included either as stand-alone text files, human-readable headers or in the appropriate machine-readable metadata fields within text or binary files as long as those fields can be easily viewed by the user.

3) No Modified Version of the Font Software may use the Reserved Font Name(s) unless explicit written permission is granted by the corresponding Copyright Holder. This restriction only applies to the primary font name as presented to the users.

4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font Software shall not be used to promote, endorse or advertise any Modified Version, except to acknowledge the contribution(s) of the Copyright Holder(s) and the Author(s) or with their explicit written permission.

5) The Font Software, modified or unmodified, in part or in whole, must be distributed entirely under this license, and must not be distributed under any other license. The requirement for fonts to remain under this license does not apply to any document created using the Font Software.

TERMINATION
This license becomes null and void if any of the above conditions are not met.

DISCLAIMER
THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT. IN NO EVENT SHALL THE COPYRIGHT HOLDER BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

Retrieved and inspected 2026-10-29. These are complete 2175 by 2917 pixel service renditions (the service selected this size for the requested 1800-pixel width), retained unmodified. Internet Archive scan leaf numbers come from
Bekker I 1831a_scandata.xml and were checked against the printed page numerals.
This printed edition is not an ancient manuscript. The source's variant notes remain visible on the retained pages. Hashes and lengths are in manifest.json.

Transcriptions in src/readings.ts join printed lines and line-end hyphenation, normalize accents/punctuation, and give exact passage boundaries. A digital Greek reader at https://aristotle.johnhboyer.com/APr/book/1/ was used to locate passages; the retained Bekker images are the authority for the selected text.
A. J. Jenkinson's public-domain translation, available through https://classics.mit.edu/Aristotle/prior.1.i.html, was consulted for comparison.
The workshop's English and teaching Latin are new, not copies of a historical translation. The Latin for 26a2-9 is explicitly abridged. Original translations, diagrams, and code: MIT, copyright (c) 2026 Anthony Mercer.
